### Extraordinary Wisdom From A Really Old Guy

Could it actually be possible for humans to live well beyond the life spans we've been programmed to expect? Is true happiness attainable? Are the people of the planet actually evolving to a higher spiritual plane? In light of current events one might be inclined to think not. But things are not always as they seem to be. In *The Legend of Kokobono*, this theme is driven home with a subtle, almost eerie certainty.

*The Legend of Kokobono* is a collection of stories as told to Charles Steed by an ancient mystic with the powers of longevity, heightened communication skills, and survival. Kokobono has lived among the people of the world and has helped to pass the torch of enlightenment to humankind.

The story begins at Steed's 25<sup>th</sup> high school reunion, where a mysterious character named John Smith appears and asks the author to publish a story he classifies as "True Mythology." After more than three years of spontaneous meetings Steed reluctantly agrees to the project. The story themes are similar in that Kokobono is drawn to people near a personal breaking point - and everyone touched by this peculiar man, including the author, is better for the experience.

Of particular interest is the account of the technology used on the lost continent of Atlantis. This dialog between the author and Smith is certain to test all we've come to know and appreciate about our own technological foundations. This book will also have the reader sincerely questioning everything we've come to accept as real or normal. *The Legend of Kokobono* is a thought provoking and inspirational book that is destined to become a classic.

Find out why James Redfield's CelestinVision.com chose Kokobono as the "Site of the Month" in August of 2001. Visit <http://www.Kokobono.com>. Charles Steed is an interesting and informative interview guest and speaker.
